

Referral for bone-conduction hearing device assessment at Bradford Royal Infirmary

Referral criteria:

- Patient is unable to wear conventional hearing aids and has tried alternative earmoulds as appropriate

AND

Patient has a conductive or mixed hearing loss where bone conduction thresholds are ≤ 65 dBHL from 0.5 – 4 kHz

OR

- Patient is unable to wear conventional hearing aids and has tried alternative earmoulds as appropriate

AND

Patient has a sensorineural hearing loss where air conduction thresholds are ≤ 85 dBHL from 3–6kHz

OR

- Has single-sided deafness, where one ear has a profound hearing loss, and the other has bone conduction thresholds ≤ 20 dBHL.

Please send referrals to the bone conduction hearing devices team at:

Audiology Department, Bradford Royal Infirmary, Duckworth Lane, Bradford, BD9 6RJ
